

Jollibee: S3 Jolly Spaghetti with Yumburger and Drink Review

Description

What Does Jollibee Jolly Spaghetti Taste Like?

One of my favorite meals in the Jollibee menu as a child is the Jolly Spaghetti. Their ingredients just has something that not even home-made Filipino spaghetti can match. I've eaten a lot of spaghetti from other fast-food but nothing can compare to my all time favorite.

The presentation of the spaghetti isn't like a 5-star restaurant but it's the flavor that matters the most. Oh yeah, don't forget to mix the spaghetti well with the banana ketchup sauce and bits of meaty Jolly Hotdog.

What Does Jollibee Yumburger Taste Like?

The Yumburger is something I would consider as a snack rather than a meal that would get me satisfied. It's not big enough to get my stomach full. It's better as a side-dish if you're looking for something that makes you feel full.

The burger is very dry since it's not cooked really fresh when served to you and that's what you get with fast-food service. What brings this Yumburger to life is not the bun nor the burger patty but their "special dressing". Honestly, it's just the sweet sauce that makes it taste good. The buns and burger patty is just bland.

The Yumburger is for people who are in a hurry for a quick snack. I'm sorry Jollibee, you have been my childhood favorite but it's just not for me. Overall, the Yumburger is my least recommended food in the Jollibee menu.

For the taste, you will feel the sourness at first few munches but when the sauce and cheese starts to mix in your mouth and a few moments later the sweetness start setting in. The hotdog meat is there to add chunkiness to the very soft texture of the spaghetti, cheese, and sauce. The hotdog also adds a cleanse or reset to your palate because of how sweet the Jolly Spaghetti is. Also, the pasta strands are

short and that makes it easy to pick up food using your fork to enjoy more servings.

What you see is what you get for this Jollibee S3 order.

Price is ₱133 for S3 Jolly Spaghetti w/ Yumburger and Drink

The price of ₱133 is cheap and just right for this meal. Well one thing for sure you should take note is

pricing of Jollibee meals is different depending on your location. Was I satisfied with this meal? For sure, I was satisfied because of wanting to maintain my body weight but for something that would make me eat for pleasure I'd definitely want more from the Jollibee menu.
