

## Maris Racal In Sexy AFRM Top and Skirt In Incognito

### Description

Finally this is where I see Maris Racal in this viral show! Her first appearance is in Episode 12 of Season 1. Grinding through every Incognito episode has me sticking to my seat. But this episode? Man, it hit me hard when Maris Racal finally showed up. I'd been waiting forever and even though her screen time was criminally short, she owned it. She rolled in speaking Italian like it's no big deal, adding this slick, exotic vibe to her character.

And that outfit? Perfect fit for her, no question. The hairstyle she wears is what got me crushing on her. It reminds me of the College girl I had a crush on back in the day. Her overall style gets me excited.

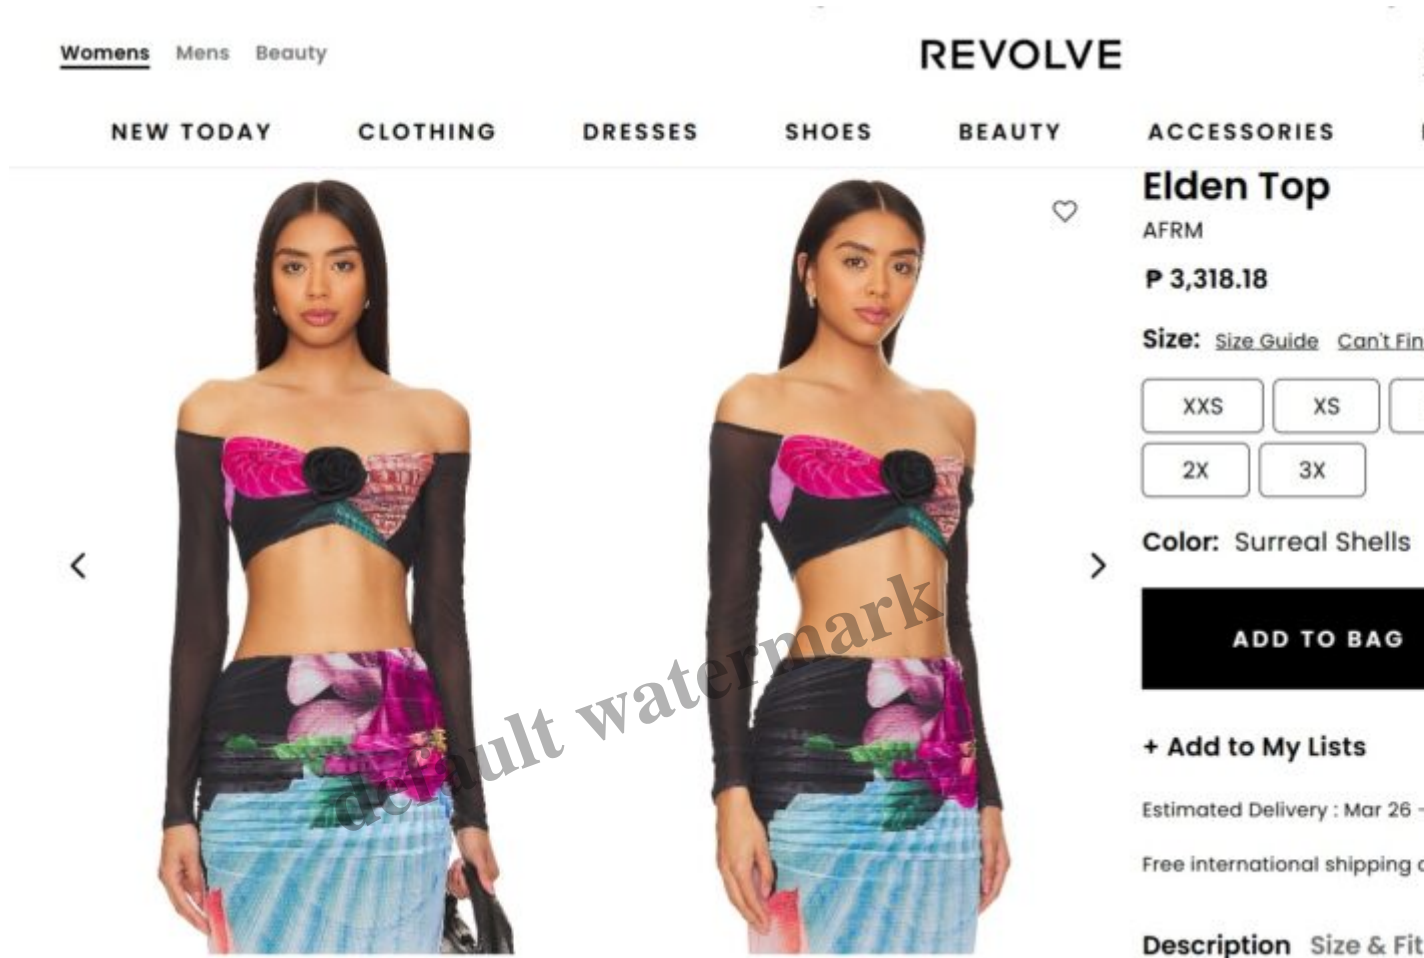

God damn! Maris Racal looks so fit here. Screenshot from Incognito Season 1 Episode 12.

## The Featured AFRM Top And Skirt

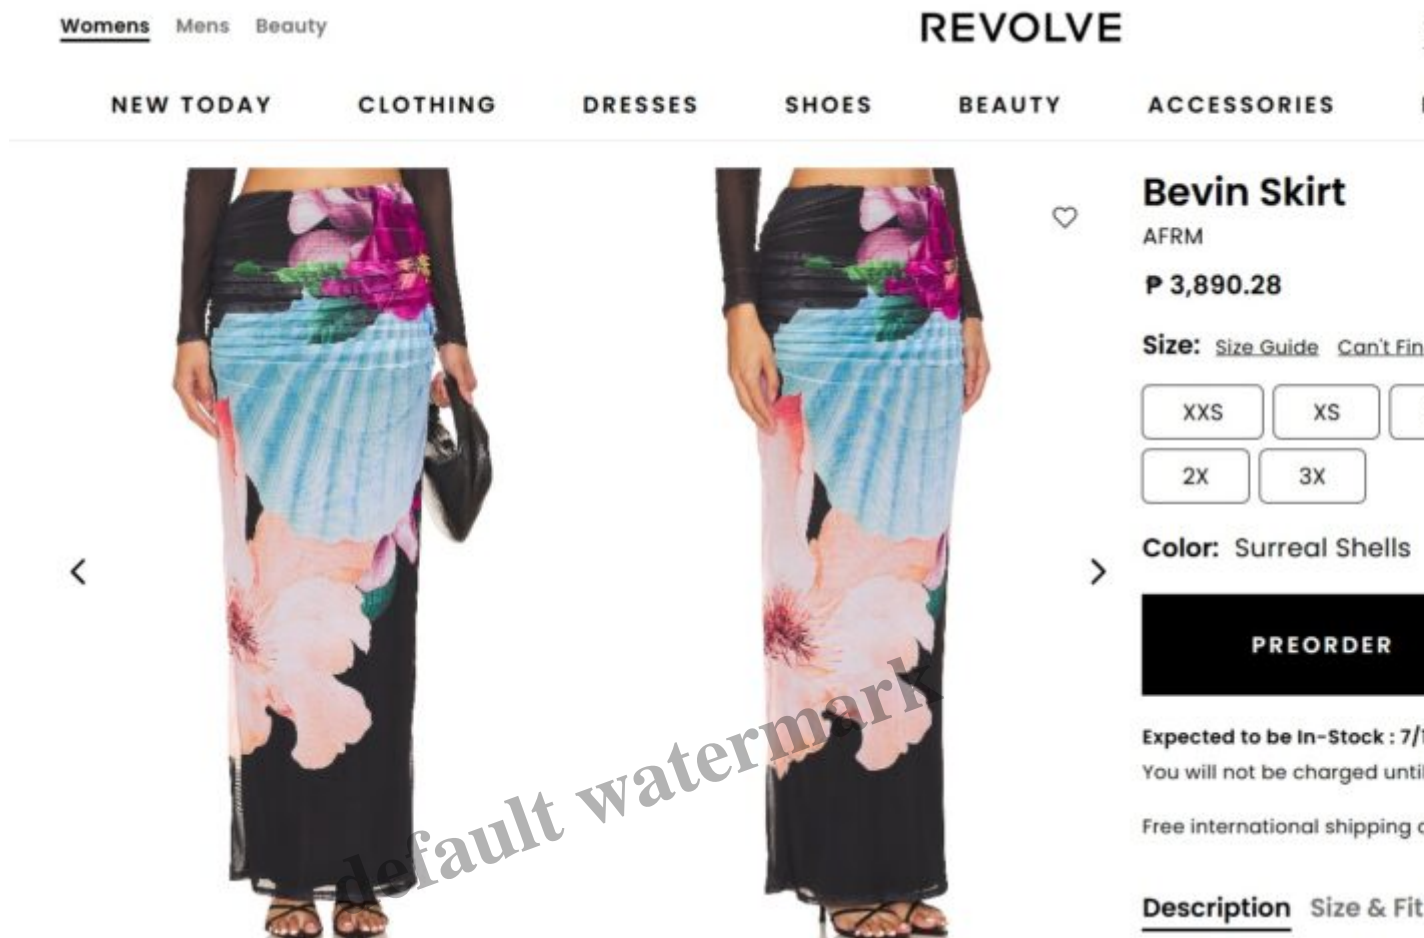

It's easy to find this outfit using only Google Lens and I've found the exact match from Revolve fashion website. The brand is called [AFRM](#) which is short for Affirmation. I don't know much about the brand but you can check more about them in their website. Sadly, they don't have the exact pair that Maris

Racal is wearing from the official site anymore.

First is the [Elden Top in Surreal Shells](#) which costs at ₱3,318.18

Second is the [Bevin Skirt in Surreal Shells](#) which costs at ₱3,890.28.

The top and skirt will cost a total of ₱7,208.46. It's expensive but I'm not interested in this. This is for all the beautiful ladies out there who wants to be like Maris Racal.

## More Maris Racal In The Future Please!

Even with the rough spots in this episode, I'm stoked for what's next. Maris Racal's intro has my heart pounding, and I'm dying to see more of her character. That quick taste we got was enough to get me hyped, and I've got a gut feeling she's gonna be my favorite before long. Now that Maris Racal is in the mix, things are about to spice up for real! I'm pumped to see how her story plays out, and I'm betting the next episodes are gonna bring the fire.
